

KICTeam, Inc. Develops Cutting Edge Cleaning Card

New Card Combines Waffletechnology With Lucky Stripe

AUBURN, Maine April 10, 2008—KICTeam Inc., the industry leader in the manufacturing of cleaning cards, is pleased to announce that they joined forces to introduce the Lucky Stripe Waffletechnology Cleaning Card for use in bill acceptors.

The Lucky Stripe Waffletechnology Cleaning Card successfully combines KICTeam's patent on Lucky Stripe with patent pending Waffletechnology design to create a cutting edge new product. The Card incorporates the universal acceptance properties of Lucky Stripe in the bill acceptor with the advanced cleaning capability of Waffletechnology.

"We saw this as a natural fit," said Peter Klein, president and CEO, KICTeam, "designed to raise the profile of the importance of cleaning cards. We look forward to continuing to develop cutting edge technology that boosts the visibility of and preference for cleaning cards."

"We have qualified the Lucky Stripe Waffletechnology Cleaning Card with a number of bill acceptor manufacturers in the vending industry and the feedback has been unparalleled in both the acceptance of the product into the validator and the cleaning ability of the Card," said Jimmy Timmins, marketing communications, KICTeam. "The Card is a real problem solver for the vending industry and addresses the necessity to maintain bill acceptors. Now, by utilizing one product, technicians and vending operators are able to keep all of their vending machines clean so they can function as they were designed to."
